Safe Water Network's - Water Entrepreneurship Training Program

BECOME A WATER TECHNICIAN OR START YOUR BUSINESS

'Water Enterprise Management' is a unique course in social water entrepreneurship offered jointly by Safe Water Network India and the Delhi University's PGDAV College (Evening), New Delhi to train youth and women in establishing, managing and operating water enterprises. This course will build professional and entrepreneurial skills in promoting self employment as a technician or owner of water enterprises. You can become a technician, learn to install water home purifiers , water meters, roof top rain water harvesting, open a shop and provide repair and maintenance services to public utilities etc.
